

Texas**Voice**Center
Voice, Swallowing, and General ENT

HOUSTON
Methodist[®]
SPECIALTY PHYSICIAN GROUP

Dear Patient:

Thank you for choosing the Texas Voice Center at Houston Methodist for your otolaryngology specialty care. Dr. Thekdi and the Texas Voice Center provide state-of-the-art care for all voice-related disorders, as well as swallowing and general ENT disorders.

To enable our office to provide more timely service, please complete these forms prior to your visit and present them to our front desk receptionist upon your arrival. Insurance company policies require proof of identity- *patients/guardians or your representative must present a photo ID and your insurance card/documentation at the time of your clinic visit.*

If a referral is required by your managed care plan, it MUST be received in our office by your appointment time. If we have not received the referral by the time of your arrival, your appointment will be rescheduled.

As we are subspecialists and often use special equipment for diagnostic and treatment purposes during office visits, certain procedures performed during typical office visits are usually not covered under insurance copay policies but fall under a procedure category that may apply toward your coinsurance or deductible. When this is the case, you will be responsible for the copay plus the coinsurance/deductible amount. You can call the office the day prior to your appointment for an estimate of the amount for which you will be responsible.

All patients are seen in the order of scheduled appointments only. Traffic and parking can sometimes cause delays, so please allow enough travel time to assure your prompt arrival. As parking is sometimes difficult to find, using the Valet parking service can be very convenient. Valet parking rates range from \$10.00 (up to 2 hours) to \$13.00 for up to 24-hours.

In consideration of other patients, please call (713) 796- 2181 at least twenty-four hours prior to your scheduled appointment if you are unable to keep your appointment so that we can help you reschedule.

If you are scheduled for an evaluation of a chronic problem (lasting more than 3-4 weeks) and you develop an acute illness, please call us to reschedule your appointment, as the acute illness may interfere with the proper diagnosis of the underlying chronic condition.

Patients coming for evaluation of throat or voice problems: If you are not diabetic, please do not eat 3 hours before your appointment; if you are diabetic, please eat enough prior to the appointment to keep your sugar from dropping. Drinking water before the appointment is okay for all patients.

We look forward to seeing you and assisting in your care.

Sincerely yours,

Dr. Apurva Thekdi, and Staff

WE TRY TO EXCEED YOUR EXPECTATIONS!

Welcome to the Texas Voice Center! Our medical and support staff are here to serve you, and want you to know what to expect when you come to our office. We offer this information in an effort to guide you through the Texas Voice Center experience, from your first appointment through your follow-up visits.

TO OUR VOICE PATIENTS:

When someone develops a voice disorder, there can be physical, emotional, professional, social and financial consequences. Because your vocal demands are unique, we provide personalized care, state-of-the-art technology and procedures, and a concerned support staff to help you recover your best voice.

MAKING AN APPOINTMENT

When you become aware of any negative change in your voice (pitch, quality, endurance, etc.), call the Texas Voice Center at (713) 796-2181. The Texas Voice Center secretary will talk with you about your voice symptoms, schedule an appointment, and remind you to fast three hours prior to your appointment. The receptionist can also discuss the fee schedule and your insurance information to verify coverage before you come in. Please complete the following forms prior to your scheduled appointment time.

YOUR FIRST VISIT

To better understand your needs, we will ask you to complete a special form for singers and actors. If you are experiencing an “acute” problem, one that has persisted for 2-5 days, we will try to schedule your visit immediately. **If you are scheduled for an evaluation of a chronic problem (lasting more than 3-4 weeks) and you develop an acute illness, please call us to reschedule your appointment, as the acute illness may interfere with the proper diagnosis of the underlying chronic condition.** A comprehensive evaluation of chronic problems will include:

OBJECTIVE VOICE ANALYSIS: We will use a computer program to analyze samples of your speaking and singing voice to obtain an accurate “picture” of your current voice. This visual profile reveals your spoken pitch range, and the status of eighteen different parameters of your voice when speaking and singing. These parameters include the status of your vocal strength, symmetry of vocal fold movements, variations in pitch and breath control, tremor, air leakage, and voice breaks.

PULMONARY FUNCTION STUDY: As breath support is the foundation for your voice, it is imperative to determine the status of your lung capacity that undergirds the voice.

MEDICAL HISTORY: A complete medical history will be taken. Please bring a *list of all* herbs, prescriptions, over-the-counter medications and other drugs you are currently taking.

VIDEOSTROBOSCOPY: Our state-of-the-art videostroboscopy equipment greatly enhances our ability to accurately assess how a particular pathology affects the ability of the vocal folds to vibrate in a normal way. The doctor uses a rigid scope to examine laryngeal anatomy and vocal fold movement, and a flexible scope for a similar examination during speaking and singing. For the examination, we ask that you not eat three (3) hours prior to your appointment, but you may drink water. Please take all medications as you usually do with a little food, if needed. If you are diabetic, please follow your normal eating routine.

DIAGNOSIS AND RECOMMENDED TREATMENT: After reviewing all the information listed above, the doctor will make a diagnosis, and recommend appropriate treatment and a follow-up visit.

SPEECH THERAPY: Our ASHA Certified Speech-Language Pathologist, who has expertise in treating voice disorders, will evaluate your voice during your first visit. If the doctor determines your treatment also requires voice intervention, you may be referred to our Speech-Language Pathologist for that intervention. Competent voice intervention by a qualified Speech Pathologist is often a medical necessity, and a mandatory part of voice management.
